

Extreme video truck.

Large scale projection in any environment.

We have the ability to project high quality large scale film and video on to anything in any situation thanks to our extreme video truck, an ex-military Bedford TM 4x4.

Kitted out with generator and atlas crane this beast stops at nothing and can literally project from halfway up the side of a cliff..!

Self contained it can run a sound system and multiple projectors in situations where power and access would otherwise be a problem.
